

The Astronomy Now index

2007

January–December 2007, Volume 21, numbers 1–12. References are presented in the following form: title, issue number (in bold type), page number. The issue number relates directly to the cover date, so 4 is April, 7 is July.

Absolute beginners by Carole Stott

Where did the Moon come from? 1, 44
 How big are the stars? 2, 44
 What do astronomers do all day? 3, 42
 How many impact craters are there on Earth? ... 4, 42
 What is a variable star? 5, 42
 Is there anything between the stars? 6, 42
 Do comets last forever? 7, 42
 Where are the planets in the sky? 8, 42
 How do we measure distances in space? 9, 42
 Is the Sun a typical star? 10, 42
 Am I really made of stardust? 11, 42
 What is a binary star? 12, 46

Ask Alan by Alan Longstaff

Focus

1: Titan by Keith Cooper
 Introduction 1, 61
 Methane, methane everywhere 1, 62
 Descending to Titan 1, 68
 Return to Titan 1, 70

2: The Local Group: By Will Gater, Kulvinder Singh Chadha and Keith Cooper
 Introduction 2, 61
 The local geography 2, 62
 There's no place like home 2, 63
 The Milky Way 2, 66
 Land of the dwarfs 2, 68
 Awesome Andromeda 2, 70
 M33: the forgotten galaxy 2, 72

3: Alien volcanoes by Michael Carroll and Rosaly Lopes
 Introduction 3, 59
 Blowing their top 3, 60
 Dead or alive 3, 62
 Fire and ice 3, 66

4: Exoplanets by Keith Cooper
 Exoplanets introduction 4, 61
 The planet boom 4, 62
 The extra-solar planets 4, 66
 The planet hunters 4, 68

5: Climate change by James Abbott, Charles Cockell and Keith Cooper
 Introduction 5, 59
 Why is the Earth warming up? 5, 60
 Goldilocks and the three planets 5, 62
 Can space exploration help save the Earth? ... 5, 66
 Astronomy and climate change 5, 68

6: Asteroids by Keith Cooper
 Introduction 6, 59
 Call the police! (the story behind the discovery of asteroids) 6, 60
 Rocks in space 6, 62
 Dawn's destinations 6, 66

7: Planetary nebulae by Owen Brazell, Keith Cooper and Martin Moberley
 Introduction 7, 59
 Beauty in death 7, 60
 Observing planetary nebulae 7, 65
 12 favourite planetary nebulae 7, 67

8: Imaging by Neil English, Martin Moberley, Grant Privett, Greg Smye–Rumsby
 Introduction 8, 59
 Taking your pictures 8, 60
 DSLRs versus CCDs – what's right for you? 8, 62
 Reducing your raw data 8, 64
 Image enhancement 8, 66
 A quick guide to using Photoshop 8, 68

9: Einstein's universe by Alan Longstaff and Ian Morison
 Introduction 9, 59
 Things ain't what they used to be 9, 60
 Warped space 9, 65

10: 50 years of spaceflight by Keith Cooper, William Harwood, David Powell and Reginald Turnill
 50 years of spaceflight 10, 23
 The Soviet Union: space pioneers 10, 26
 The space shuttle 10, 30
 Last man on the Moon 10, 34
 The next 50 years 10, 36

11: Astronomy societies by Neil Bone, Keith Cooper, Robin Scagell and Greg Smye–Rumsby

Introduction 11, 61
 Support your local group 11, 62
 Young stargazers unite! 11, 65
 Where's your nearest society? 11, 66
 How to create a society website 11, 68
 What will you be doing in 2009? 11, 70
12: Mars by Neil Bone, Kulvinder Singh Chadha, Alan Longstaff, Ian McCrugh-Welland and Martin Moberley
 Introduction 12, 23
 Sketching the red planet 12, 24
 Imaging Mars at its highest 12, 26
 Herschel's Mars 12, 28
 Life on Mars? 12, 30
 The dance of the planets 12, 32

In the shops
 1, 79; 2, 82; 3, 75; 5, 75; 6, 75; 7, 75; 8, 75; 9, 75; 10, 75; 11, 73; 12, 73

Key moments in astronomy by Ian Seymour
 Wellington's astronomer – Thomas Brisbane 1, 94
 The reluctant astronomer 2, 94
 Watkin Maddy – the astronomer who made virtue his vice 3, 88
 Titter ye not – the forgotten rival of *The Sky at Night* 4, 88
 The comet king – William Robert Brooks 5, 89
 Dark star – John Michell, pioneer and party animal 6, 89
 The son and the Moon: George Darwin 7, 89
 An astronomer and a gentleman: the first Mr Birt 8, 88
 Made in heaven: the strange love of Richard Carrington 9, 89
 Typecast: Alexander Wilson 10, 89
 The prophetic John Holwell 11, 90

Mission status by Steven Young/Justin Ray
