

MAKE YOUR OWN GLOBE OF
PLUTO

Cut out the shape of Pluto – the more care at this stage, the better the final globe. Now glue each tab and slide under its counterpart and then press in place to fix. Do not fold at any point.

Named surface features have not been officially adopted

PLUTO
DIAMETER: 2,320 KM

CHARON
DIAMETER: 1270 KM

Check astronomynow.com for updated versions of this globe.
